- 🌲 The SWCD sells good quality trees, but offers no guarantee of survival or availability of items ordered.
- 🌲 Our stock is limited to what our wholesale suppliers can provide.
- 🌲 A 20% deposit is required on all orders over \$50.00 with the balance due at the time of pick-up.

**Make checks payable to Freeborn County SWCD.**

- 🌲 We will contact you when the orders are ready to be picked up, generally around the 3rd or 4th week of April.

<b>Evergreens</b>	<b>Deciduous Trees Continued</b>
-------------------	----------------------------------

<p><u>Arborvitae, American, Thuja occidentalis</u> – Height of 40 – 50'. Also known as Northern White Cedar. Pyramid shaped tree with soft green scale-like needles. Excellent windbreak tree for homesites. Tolerates most sites.</p>	<p><u>Cedar, Eastern Red, Juniperus virginiana</u> – Height of 40 – 50'. Native to IA. Sharp green scale-like needles. Good for wildlife. Tolerant of most light and soil conditions.</p>
--	---

<p><u>Pine, Red, Pinus resinosa</u> – Height of 50 - 80'. Also known as Norway Pine. Long needled, pyramid shaped tree. Prefers well-drained, sandy soils. Popular Christmas tree species. Needs up to 20' spacing to avoid overcrowding of lower branches.</p>	<p><u>Pine, White, Pinus strobus</u> – Height of 80 - 100'. Fast growing, tallest conifer species in MN. Pyramid shaped when young, broadening with age. Prefers sandy or silt loam soils, but will tolerate a wide range. Needs at least 20' spacing to avoid overcrowding of lower branches.</p>
---	--

<p><u>Spruce, Black Hills, Picea glauca var. densata</u> – Height of 40 – 50'. Native to Black Hills, SD. Geographical strain of white spruce. Slow growing, conical tree with dark green needles. Hardy and more drought resistant than White Spruce.</p>	<p><u>Spruce, Colorado, Picea pungens</u> – Height of 50 – 100'. Native in Rocky Mountains region. Dense conical tree. Prefers moist soil but can do well in dry sites, and is intolerant of shade. Slow-growing. Susceptible to Cytospora canker.</p>
--	--

<p><u>Spruce, Norway, Picea abies</u> – Height of 80 – 100+'. Native to Europe. Pyramidal tree with drooping branches. Fastest growing, and tallest species of spruce.</p>	<p><u>Spruce, White, Picea glauca</u> – Height of 40 – 80'. Native to north central U.S. and Canada. Bluish needles. Prefers fertile soils and is tolerant of most light conditions. Good for windbreaks and winter wildlife cover.</p>
--	---

<b>Deciduous Trees</b>	<b>Shrubs</b>
------------------------	---------------

<p><u>Birch, River Betula nigra</u> - Height of 40'-60'. Fast growing, but short lived. Tolerates wet areas. Shade intolerant. Light reddish brown bark with yellow leaves in the fall.</p>	<p><u>Cherry, Black Prunus serotina</u> - height of 30-60' and moderately fast growing. <u>Cherry, Nanking, Prunus tomentosa</u> - Height 6-10'. Tolerates wind and dry soils. Dense twigs make good screen. Needs full sun. Both produce fruit for wildlife.</p>
---	---

<p><u>Chokecherry, Common, Prunus virginiana</u> – Height of 15-20'. Produces edible reddish-purple or black cherries that ripen in late summer. Needs well drained soils. Pruning may be necessary. Excellent plant for wildlife food &amp; cover.</p>	<p><u>Crabapple, Red Splendor, Malus "red splendor"</u> – Height and spread of 15-25'. Leaves are green or reddish, flowers are white or pink followed by fruits ¼” to 1” in diameter. Full sun. Quality food source for wildlife.</p>
---	--

<p><u>Hackberry, Celtis occidentalis</u> – Height of 30-60+'. Tall, wide spreading crown. Has a scaly or warty bark. Produces dark purple fruit. Grows best in well drained, moist soils. Excellent cover and food source for wildlife. Intermediate shade tolerance.</p>	<p><u>Little-Leaf Linden, Tilia cordata</u> – Medium tree with compact, cone-shaped crown. Roots are wide-spreading and deep, which makes it an excellent soil builder. Prefers loamy soils. Produces flowers with small nutlets on a hanging stalk.</p>
---	--

<p><u>Maple, Red, Acer rubrum</u> – Height 40-70'. Native to MN. Saw toothed lobed leaves. Shade tolerant, grows in very wet to dry conditions, moderately fast growing. Leaves can turn red, yellow or orange in fall.</p>	<p><u>Maple, Sugar, Acer saccharum</u> – Height of 60-80' Produces dense, oval crown and bright fall colors ranging from yellow to orangish red. Slow-growing, needs well-drained, loamy soils. Not tolerant of wet soils. Shade tolerant. Used to make maple syrup.</p>
---	--

<p><u>Oak, Bur, Quercus macrocarpa</u> – Height of 70-80+'. Simple lobed leaves and produces acorns and tree with corky appearance. Good for wildlife. Tolerates a variety of soil types. Long-lived but slow growing.</p>	<p><u>Oak, Red (Northern), Quercus rubra</u> – Height of 60-80+'. Simple lobed, bristle-tipped leaves. Red or brown fall leaf color. Good for wildlife. Prefers deep, rich soils, intolerant of drier alkaline soils. Long-lived and fastest growing oak. <u>Oak, Pin Quercus palustris</u> - Similar to red oak but drier and acidic soil.</p>
--	---

<p><u>Plum, American, Prunus americana</u> – Height of 12-25'. Fast growing small tree. Fragrant white flowers are followed by edible fruits, yellow or red in color suitable for jellies. Quite adaptable. Thicket forming.</p>	<p><u>Poplar, Norway, Populus deltoides x nigra</u> – Height up to 80+'. Grows very fast and tall. Good for windbreaks when used as a temporary species. Short lived. Norway is best adapted of the poplar species.</p>
--	---

<p><u>Walnut, Black, Juglans nigra</u> – Height of 50-60+'. Native to IA. Fast growing. Leaves are pinnately compound and produce a hard shelled nut. Good for wildlife. Prefers moist well-drained soils.</p>	<p><u>Willow, Hybrid, Salix matsudana/alba</u>, Large tree up to 75'. Single stemmed tree good for windbreaks. Avoid planting near other willows and in areas where uncontrolled spread is possible.</p>
--	--

<p><u>Arrowwood, Viburnum dentatum</u> – Height of 6-10'. Native of eastern and mid-western U.S. Produces cream colored flowers followed by small blue or purple fruits. Favors moist but well drained soils of varying pH. Good food source for wildlife.</p>	<p><u>Cranberry, American, Highbush, Viburnum trilobum</u> – Height 10 – 16'. Produces white flowers and red edible fruit, with excellent fall color. When planted as a hedge, makes a good snow catch/screen in the winter. Good for wildlife. Tolerates a variety of soils.</p>
--	---

<p><u>Dogwood, Gray, Cornus racemosa</u> height 8' and 5' wide. Grows well in poor soils. White fruit is eaten by a variety of wildlife.</p>	<p><u>Dogwood, Redosier, Cornus sericea</u> – Height of 8-10'. Fast growing native shrub. This shrub has bright red stems and produces clusters of white fruit. Good for wildlife. Prefers moist sites.</p>
--	---

<p><u>Hazelnut, American, Corylus americana</u> - Height of 3-10'. Shade tolerant. Produces edible nuts eaten by birds and mammals. Variable fall color. Can reproduce by suckering.</p>	<p><u>Honeysuckle, Arnold Red, Lonicera tatarica</u> - Height 10-12'. Large round headed shrub. Has pink flowers that are replaced with orange berries which are eaten by birds. Tolerates drought and pH ranges</p>
--	--

<p><u>Tree Tubes</u>, A plastic, vented tube which protects hardwood trees and some shrub seedlings from animal browse, mower and spray damage. <u>Stakes</u>: should be used to support tree tubes or can be used as row or tree markers.</p>	<p><u>Tree Mats</u>, A permeable woven plastic that greatly reduces weed competition, reduces maintenance time, and increases soil moisture. Comes with 5 anchoring staples.</p>
--	--

<p><u>Nannyberry, Virburnum lentago</u> – Height of 10-20'. Fast growing. Glossy leaves with cream flowers followed by blue-black berries. Tolerates wide range of soils and pH. Attractive for shiny foliage and red fall color.</p>	<p><u>Lilac, Chinese, Syringa x chinensis</u>- Height of 8-12'. Large, round-headed shrub. Profuse bloomer, with purple flowers in May. Prefers well-drained soils and full sun for best flowering effect. <u>Lilac, Villosa Syringa villosa</u> - later blooming.</p>
